The primary objective of the military health system, which includes the Defense Departments hospitals, clinics, and medical personnel, is to maintain the health of military personnel so they can carry out their military missions and to be prepared to deliver health care during wartime. The military health system also covers dependents of active duty personnel, military retirees and their dependents, including some members of the reserve components. The military health system provides health care services through either Department of Defense (DOD) medical facilities, known as military treatment facilities or MTFs as space is available, or through private health care providers. The military health system currently includes some 56 hospitals and 365 clinics serving 9.7 million beneficiaries. It operates worldwide and employs some 58,369 civilians and 86,007 military personnel. Other TRICARE plans include TRICARE Young Adult, TRICARE Reserve Select and TRICARE Retired Reserve. TRICARE also includes a pharmacy program and optional dental plans. Options available to beneficiaries vary by the beneficiary's duty status and location. This report answers several frequently asked questions about military health care, including: How is the military health system structured? What is TRICARE? What are the different TRICARE plans and who is eligible? What are the costs of military...
