Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1876 Excerpt: . . . One seer of seed furnished Soubeiran by this process rather more than 11 fluid ounces of oil, six by the first step and five by alcohol. History. --Herodotus (lib. ii. c. 94) says that, The Egyptians who live about the fens use an oil drawn from the fruit of the Sillicypria, which they call kiki, and they make it in the following manner: --They plant these Sillicypria, which in Greece grow spontaneously on the banks of the rivers and lakes; these when planted in Egypt bear abundance of fruit, though of an offensive smell. When they have gathered it some bruise and press out the oil, others boil and stew it, and collect the liquid that flows from it; this is a fatty oil and no less suited for lamps than that of the olive, but it emits an offensive smell. Upon this Blakesley comments thus: -- The Hellenic name of this plant was according to Hesyclius, croton, it being in fact that from the seeds of which the modern croton oil is expressed. Blakesley, Herod, i. p. 231, note.) Seeds in Museum from Bombay, Mangalore, Madras, Burma; and oil from Calcutta. Bibliography. --United States Dispensatory (1867), p. 606. Amer.
