This book is an endeavor by one bred in the North to write sympathetically the annals of a Virginia family, and to show how, amid the conditions following the war, it was impossible for the wealthy planters to recover their status upon the old basis. In its broader aspect the story is a symbol of the extinction of the Southern aristocracy and their ideals and traditions as social forces. The scene is localized in Virginia, but the events give a composite picture of what took place in the South at large during the years of the Reconstruction. In one sense the narrative is fiction; but in another and truer sense, for most of the incidents have warrant in fact, it is a history of general conditions turned into the concrete. Other books have been written on this subject; but no Northern writer of fiction, so far as I know, has gone out of his own environment and has taken up the case of the Southerners for the purpose of learning and writing absolutely from their point of view.
