Hydrologic and Geochemical Controls on Pesticide and Nutrient Transport to Two Streams on the Delmarva Peninsula: Usgs Scientific Investigations Report 2004-5051 (Paperback)

Filesize: 8.22 MB

Reviews

Undoubtedly, this is the very best job by any article writer. It can be rally interesting throgh studying time. Your way of life period is going to be transform as soon as you comprehensive reading this article pdf. *(Louie Will)*

HYDROLOGIC AND GEOCHEMICAL CONTROLS ON PESTICIDE AND NUTRIENT TRANSPORT TO TWO STREAMS ON THE DELMARVA PENINSULA: USGS SCIENTIFIC INVESTIGATIONS REPORT 2004-5051 (PAPERBACK)

To get Hydrologic and Geochemical Controls on Pesticide and Nutrient Transport to Two Streams on the Delmarva Peninsula: Usgs Scientific Investigations Report 2004-5051 (Paperback) PDF, please access the web link below and download the document or gain access to additional information which might be have conjunction with HYDROLOGIC AND GEOCHEMICAL CONTROLS ON PESTICIDE AND NUTRIENT TRANSPORT TO TWO STREAMS ON THE DELMARVA PENINSULA: USGS SCIENTIFIC INVESTIGATIONS REPORT 2004-5051 (PAPERBACK) ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. Pesticides and nutrients move from application areas through ground water and surface runoff to streams on the Delmarva Peninsula. The relative importance of different transport media to the movement of these compounds in different watersheds is related to locally variable hydrologic and geochemical conditions among areas of regionally similar land use, geology, and soils. Consideration of such local variability is important to land-management efforts or future environmental investigations on the Peninsula. Chemical analyses of samples collected over a multiyear period from two streams on the Delmarva Peninsula were analyzed along with similar available analyses of ground water to document the occurrence of pesticides and nutrients, and illustrate important processes controlling their movement through watersheds to streams. The upper Pocomoke River and Chesterville Branch drain predominantly agricultural watersheds typical of the Delmarva Peninsula. Chesterville Branch drains a watershed of moderate relief, good drainage, and a permeable surficial aquifer that ranges in thickness from about 15 to 25 meters. The upper Pocomoke River Watershed, however, is extremely flat with poorly drained soils and abundant artificial drainage. Influences on the chemistry of water in each stream were determined from seasonal patterns in the concentrations of selected constituents from 1996 through 2001, and relations with streamflow. Nutrients and pesticides are detectable throughout the year in the upper Pocomoke River and Chesterville Branch. Water in both streams is typically dilute, slightly acidic, and well oxygenated, and nitrate and phosphorus concentrations generally exceed estimated natural levels. Pesticide concentrations are generally low, although concentrations of selected metabolites commonly exceed 1 microgram per liter, particularly in Chesterville Branch. Nitrate and metabolites of pesticide compounds are apparently transported to Chesterville Branch preferentially through ground water in the...
